

Australian leader
in the **manufacture** of
conventional and specialised
paper roll products

WHERE YOU KNOW what you get!

WE NOW SUPPLY OUR ROLL LENGTHS (IN METRES) TO ALLOW YOU TO COMPARE!!!

Some frightening trends in the Australian Marketplace have unearthed themselves, but Paper Rolls Australia can help protect you against potential legal issues.

Have you ever had the experience of a client telephoning you in a panic requiring a few extra paper rolls as their current supply is exhausted?

“Last time we ordered paper rolls from you they lasted a month, this current batch only lasted 3 weeks and our sales are down this month!”, the client protests. “Why?”, you ask.

It is industry standard that paper rolls are measured in width x height x core size, the overall length of the roll does NOT come into the equation. Paper rolls vary greatly in length depending on their origin. A box of 50 rolls measuring 80mm x 80mm x 12mm core could have a combined overall length of 2900 metres from one manufacturer and 3700 metres from another, that’s an **800 metre difference!**

2900 METRES LENGTH

MISSING 800M?

3700 METRES LENGTH

Do you know what your cost per receipt is?

There is a reason why paper roll A is more keenly priced than paper roll B. Ask yourself, am I giving my client what they are paying for? What is the archival quality of this product? Do I know the length of the rolls? Am I creating a risky environment for my client by supplying their business with an inferior product? Could I be liable if my client experiences trading issues due to thermal head damage or unknown roll length causing the shut down of POS registers (lost revenue opportunities)? Are customers going into stores with illegible receipts demanding goods to be exchanged or returned?

Paper Rolls Australia’s quality is guaranteed for size consistency, archival coating quality, length of the roll, stock weight, width and all other attributes. We are that confident in our quality control and integrity of product that we will refund you in full if we don’t match the specification. Who else in Australia does that?

Let us test your current supplier or manufacturer now for a **free comparison** across the full specification. Don’t get caught through no fault of your own. Expose your competition and educate your customers... or miss out.

To make a no obligation appointment or to arrange your free comparison please contact the Paper Rolls Australia team on +61 2 9738 5600.

Are you interested in increasing your customer's revenue?

How do your customers market their business? Have they ever thought of promoting something on the back of their receipt rolls?

Paper Rolls Australia has the experience and manufacturing ability to demonstrate to you how marketing information, store details, promotions or returns policies can all be printed on the back of your plain paper rolls or thermal receipt rolls - in colour - and it doesn't fade!

Research shows that customers perceive retailers who custom print on their receipt rolls to be of a higher standing than those who do not. Custom printed receipt rolls can really make a difference to your clients profile. Print their company logo and contact details, or customised information like special offers to make their business stand out from the rest. You may even consider on-selling printed space on the back of your receipt rolls to third party advertisers. This space is vital real estate that gets in to the hands of the target market, why not use it?

To learn more about custom printed receipt rolls and how they can enhance your business, please contact our team on **+61 2 9738 5600** or visit our website www.paperrolls.com.au

*We are currently transitioning our Gold Thermal Paper from 58gsm to 55gsm. Our length will remain the same as above, however the outer diameter may differ.
